## AUGUST 16-23, 2014

Travel with Seacology and the National Aquarium on the first-ever joint trip of these two exceptional nonprofit organizations to the Jean-Michel Cousteau Resort on Vanua Levu Island for seven nights of water, reef and luxury. Visit two nearby villages where Seacology projects have improved the lives of Fijians while protecting surrounding forests and coral reefs.

*Trip co-hosted by:*

The award-winning, five-star Jean-Michel Cousteau Resort is one of the most renowned vacation destinations in the South Pacific.

Located on the island of Vanua Levu on 17 acres of a coconut plantation, the luxury hotel accommodations overlook the peaceful waters of Savusavu Bay.

The resort is an international favorite for romance, honeymoons and weddings; scuba divers; snorkelers; and families who want to combine heavenly surroundings and exceptional dining with an unsurpassed range of eco-friendly activities. Jean-Michel Cousteau Resort is the only luxury resort that employs a full-time marine biologist to help visitors appreciate the underwater wonders of Fiji.

John Racanelli, CEO of the National Aquarium, and Susan Racanelli, Seacology's National Development Officer, will lead the group.

# BULA CLUB

The resort's complimentary Bula Club gives kids a chance to learn about Fijian culture and explore the natural world around them.

The Bula Club operates from 8 am to 9 pm daily so that parents can enjoy holiday activities on their own, confident that their children are in good care and are having fun with the resort's staff nannies and "buddies."

The Bula Club grounds feature a kids-only freshwater swimming pool, jungle gym, slide, sandbox, and an activities bure for arts and crafts. All Bula Club activities and services are provided at no extra charge.

This vacation includes visits to Seacology project sites in two communities on Vanua Levu Island.

Not far from the resort, we'll drop by the preschool built with Seacology funds in Nukubalavu, a relatively large village with a population of about 300. In exchange for the school, the people of Nukubalavu agreed to protect over 22,000 acres of marine habitat.

We'll also visit the Qumusea District on the island's north coast where the Great Sea Reef, the world's third-largest barrier reef, sits offshore. In exchange for the funds for a new kindergarten classroom and a plant nursery, villagers agreed to cease slash-and-burn practices within a 4,000 acre forest area, and will replant 50,000 trees over the next 20 years.

For questions or to make a reservation, please contact:

Mr. Randy Gardner  
Jean-Michel Cousteau Resort Fiji
